

Java Assignment - Student Grade Management System

Objective

Write a Java program to manage students' grades using the concepts learned so far.

Program Requirements

Assume there are 5 students and each student has grades in 3 subjects.

Step 1

Ask user to enter the names of the 5 students and their grades

Step 2 - Main Menu

Display the below menu:

1. Show All Students names.
2. Show all Students grades in each subject.
3. Search Student by name.
4. Count Passed Students
0. Exit

Input Validation

Grades must be between 0 and 100. If an invalid grade is entered, print 'Invalid grade.' and ask again.

Bonus

- Display average for each subject.
- Display highest grade in each subject.
- Display letter grades (A-F).
 - Grade $\geq 85 \rightarrow$ A.
 - Grade $\geq 75 \rightarrow$ B.
 - Grade $\geq 65 \rightarrow$ C.
 - Grade $\geq 50 \rightarrow$ D.
 - Otherwise $\rightarrow$ F.
